

# Oil Safe®

For more than a decade, the Fluid Defense Oil Safe System has been the oil transfer management system preferred by leading companies around the world.

People often go to great lengths to preserve the quality of their oil only to contaminate it by using filthy containers, pouring it through a dirty funnel, or inadvertently mixing it with different oil.

The Oil Safe system is a fully sealing unit that prevents contaminants from getting into the oil. The pour spouts available make dispensing quick and easy and with 10 different colors help prevent cross contamination.

## Available in 10 Colors

Oil Safe down-stroke pump delivers 1 liter with approximately 12 strokes

Fully interchangeable drums and lids, any style lid works with any size drum

See through drums with graduated markings in both liter and US quarts make it easy to see and measure levels

Bright colors make Oil Safe dispensers easy to find and easy to color code lubricants

Quick twist spout is easy to open and close. Controls flow and keeps dirt out

Push button auto shutoff air intake enables smooth pouring of lubricants

Robust lid design for easier handling

**WARNING:** Not suitable for fuels or solvents.
