by FluidDefense

**THINK. WORK. FLOW.**

# THIS IS THE SYSTEM

that ensures the process

that simplifies the maintenance

that extends the life of the machines

that make the product

# THAT KEEPS YOUR BUSINESS RUNNING

# OILSAFE® SAFEGUARDS YOUR WORKFLOW

The OilSafe lubrication management system is visually intuitive removing risk from your maintenance process at every step along the way. It prevents the machine failures and downtime you thought were unavoidable. And it keeps your entire manufacturing environment running better, longer, safer, cleaner — so your business will, too. OilSafe. Think. Work. Flow.

## Store

Color-coded bulk storage keeps your storage area neat, safe and free of those messy 55-gallon drums. Modular and scalable, the unit can be configured to your exact needs and arrives preassembled for easy setup. Each tank has its own pump and filter to prevent cross-contamination.

## Transfer

Precise-pour transfer containers feature push-button air intake valves, quick twist spouts and ergonomic manual pumps for fast, smooth pouring and pumping. They come in a range of sizes with interchangeable, color-coded lids.

## Apply

Customizable labels integrate throughout the entire system to make sure every lubricant goes in the right place — from bulk storage to the point of application. Just match the shapes and colors. Industrial-grade materials guarantee decades of accuracy.

## Gain

OilSafe prevents contamination, errors, spills and slowdowns, simplifying your maintenance process. This extends the life of your machines that make your products which keep your business running.

**“We needed a fully integrated solution at the plant level to enable best practice in lubrication storage and handling. OilSafe delivered, with an intuitive, state-of-the-art and affordable system.”**

— John Underwood, DuPont

**Get your instant plant floor upgrade.**

OilSafe's palletized design ensures fast, easy setup with little training.

**Not ready for the whole system?**

Start with a label or transfer container to improve your workflow.

**Fluid Defense** delivers fully integrated fluid storage and handling solutions that drive value from the production line to the bottom line. The OilSafe® lubrication management system, our easy-to-implement flagship innovation, helps you keep a safe, clean storage area and prove your commitment to best practices. Customizable, visually intuitive labels ensure consistent fluid identification throughout your manufacturing environment. Other features include bulk storage, in-line filtration and precise-pour transfer containers — all designed to simplify maintenance and safeguard your workflow. After years of delivering strong results, OilSafe has become the recognized standard in industries ranging from food and industrial products to mining.
